

VIBRANIAM

SAMPLER

The 16-pad sampler built on Oboe — minimum latency on Android

VIBRANIAM Sampler turns your phone into a fast, hands-on sampler and step sequencer. Tap pads, record or import your own sounds, play a floating keyboard or MIDI controller, shape everything with filters, delay, reverb and drive, then export your song as WAV, FLAC, M4A or MIDI.

KEY FEATURES

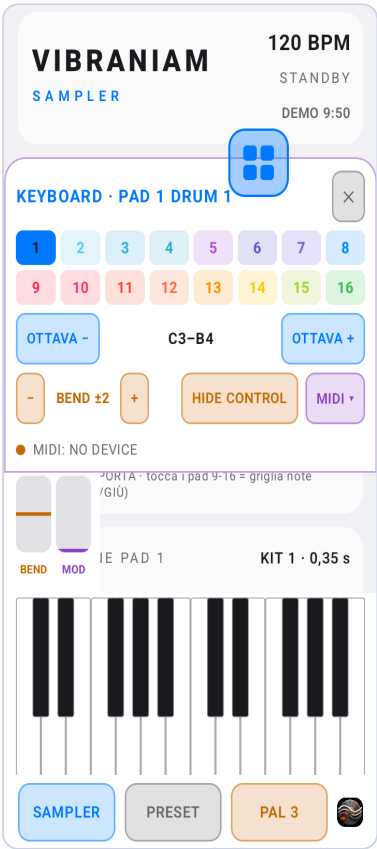

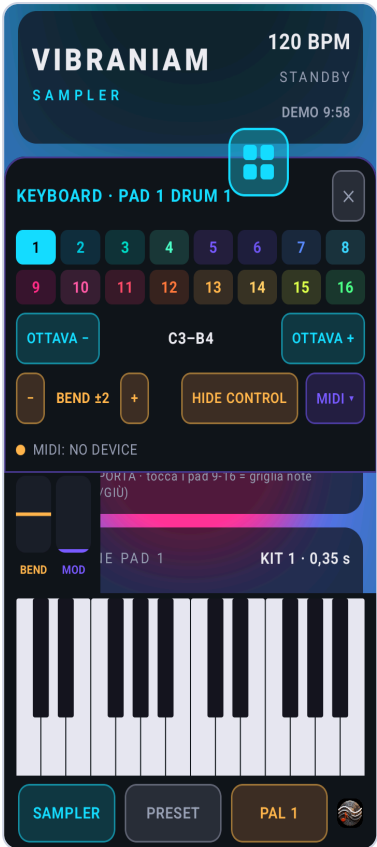

- 16 pads: 8 drum pads and 8 pitched pads with a 4-octave note grid
- Native C++ engine on Google Oboe, real-time safe audio callback
- 16-step sequencer, 512 patterns, 512-slot song chain
- Record with the mic or import WAV, MP3, OGG, M4A (up to 6 s per pad)
- 13 built-in synthesized instruments and a preset browser
- Floating 2-octave keyboard, bend and mod wheels, USB / Bluetooth MIDI input
- Channel FX per pad, global FX rack, chord matrix, 16-channel mixer
- Global recording of the mix; export WAV, FLAC, M4A (master or 16 stems) and MIDI
- 4 colour palettes; no ads, no data collected

AT A GLANCE

Platform	Android 8.0+
Audio	Oboe / AAudio, 44.1 kHz float stereo
Model	Free demo (10 min per session) + one-time unlock
Developer	Christian Brogi — VIBRANIAM
Languages	EN · IT · ES · DE · ZH · AR (manual)
